Product overview

Intel Atom/VIA solution, without fan, touch-screen, water-proof, LED background panel, utan fläkt, pekskärm, vattensäker, LED bakgrundspanel.

PANEL PC information

LCD Panel..... CPT
Resolution..... 800 x 480
Brightness (cd/m²).....250
Contrast Radius.....400 : 1
Backlight..... LED
Number of colours..... 262144
Touchscreen4 wires / Resistive touchscreen
Assembly specification.....VESA 75
Waterproof panel frameIP65
Accessories (Optional)Wall mounting kit/rack

Panel PC without fan

Dimensions 58 H x 189 W x 128 D mm
Weight.....1.2 kg (inkl. M/B)
MaterialFrame in plastic + aluminium
Storage.....CF Card / 2.5" HDD
Operating humidity5 ~ 90% @ 39°C, non condensing

M/B Information (please see M/B specification)

WEATHER SYSTEM VANTAGE PRO 2

First and only weather station in its class to use frequency hopping spread spectrum radio technology to transmit weather data wirelessly up to 1000' (300 m).

Vantage Pro 2 weather stations are available in both wireless and cabled versions. All include the Davis innovative integrated sensor suite, which combines the rain collector, temperature and humidity sensors and anemometer all into one package - making setup easier than ever and improving performance and reliability.

Contents of the Free Mini Installation Kit

- 1 x 1 metre (2.6ft) aluminium mast
- 1 x 6 inch stand-off bracket
- 2 x U-bolts and nuts (44mm)
- 4 x Exterior coach screw
- 4 x 10mm nylon wall plugs 2 x 6mm nylon wall plugs
- 10 x Cable ties 1 x Instruction manual

Delivered With

Vantage Pro 2 console/receiver

Integrated sensor suite and mounting hardware

Integrated sensor suite includes:

- Rain collector
- Temperature and humidity sensors
- Anemometer - 40' (12m) anemometer cable
- Solar panel

Technical Data

Sensor suite is solar powered

Electronic components are housed in a weather-resistant shelter

Console may be powered using the included AC-power adapter or with three C batteries (not included)

Wireless range is up to 1000' (300 m) outdoors - in line of sight

Typical range through walls under most conditions is 200' to 400' (60 to 120m)

Add wireless repeaters for distances up to 1.7 miles (2.7 km)

Rain Collector

With its self emptying tipping bucket is exceptionally accurate

You can read rainfall amount in 0.01" or 0.2mm increments

Designed to meet the guidelines of the World Meteorological Organization, the Davis aluminium plated tipping bucket is corrosion-resistant and laser calibrated for accuracy

Anemometer

The anemometer includes both wind speed and direction sensors

Rugged components stand up to hurricane force winds, yet are sensitive to the lightest breeze

The anemometer is wind-tunnel tested to speeds in excess of 170 miles per hour (274 km/h)

Temperature and Humidity Sensors

These are located within the radiation shield

The shield protects the sensors from solar radiation and other sources of radiated and reflected heat

Wireless Integrated Sensor Suite

The ISS runs on solar power

Lithium battery provides back-up at night and on wintry, cloudy days

(Solar panel is not included with cabled version)

SNOW SWITCH MODEL LCD-8

Environmental Technology, Inc.

Features & Benefits

- Automatic snow and ice melting controller minimizes operating costs.
- Automatic voltage selection operates from 100VAC – 240 VAC
- Adjustable hold-on time and temperature set point provides flexibility for a wide range of applications.
- Rated for up to 3 amp inductive loads for pilot duty applications and resistive loads up to 16 Amps.
- Sno-Test™ automatic testing and manual heater cycle for system testing.
- Simple four-wire installation.
- C/UL/US-listed for temperature regulating equipment.

Description

The Snow Switch Model LCD-8 configurable aerial snow melting controller makes automatic snow melting a cost effective alternative in even the smallest applications. Heaters operate at temperatures below the set point, 3.3°C default, only when required. The adjustable hold-on period, 3 hours default, continues heater operation after snow stops to ensure complete melting. The LCD-8 controller includes an internal magnetic reed switch used for manual heater cycling, as well as configuring the temperature set point and the hold-on-time.

Forts nästa sida

The LCD-8 controller operates from either an automatic selecting 100VAC – 240VAC or from 24VAC. These two voltage options combine with the configurable hold-on time and temperature set point to meet the need of a wide number of applications using just two part numbers.

It controls heater loads up to 16 amps resistive or 3 amps inductive. The operating temperature range extends from –40°C to 60°C. The redesigned, patent pending, rugged polycarbonate enclosure provides excellent protection at temperature extremes, while allowing snow to shed to prevent iglooming over the moisture sensor.

The internal magnetic reed switch allows for both configuration and manual heater operation without the need for external switches – which are susceptible to damage – or the need to open the enclosure.

Verifying system functionality after installation or when troubleshooting used to require spray circuit cooler or ice for controller activation. The Sno-Test™ feature eliminates this need by performing a self-test after power application, and operating heaters in a unique pattern for a few seconds. Reading the test results takes only an AC voltmeter or clamp-on ammeter.

For complete information describing its application, installation and features contact us!

LCD® -1H & LCD® - 3H SNOW SWITCH

Features & Advantages

- Minimum energy costs
- Automatic snow melting
- Snow melt only when necessary
- Sense both temperature and precipitation
- Performance optimized for hydronic applications
- Simple installation
- Reliable
- Low cost

LCD-1H & LCD- The LCD-1H & 3H Snow Switch saves energy by providing snow melting only when required during snowfall and for a time thereafter to ensure complete melting.

As heavy, wet spring and autumn snow often occurs above freezing, the LCD-1H & LCD-3H detects precipitation as snow at temperatures below 38°F (3.3°C). The LCD-1H's internal, isolated 3 amp relay contact remains closed for a 5-hour hold-on time after snowfall stops to ensure complete snow melting and pavement drying. The LCD-3H remains closed for 1-hour hold-on time.

The LCD-1H & 3H Snow Switch achieves high performance at low cost through microprocessor control. Members of the LCD product family have provided more than 70 million hours of reliable snow melting control.

For complete information describing application, installation and features, please contact us personally, +46-301-418 50.

Installation

The LCD-1H Snow Switch housing has one 1/2" (16mm) NPT threaded opening. Choose an unobstructed elevated location exposed to snowfall. Rigidly mount in upright, plumb position as shown. Connect the black and white wires to the 24 VAC power supply. Yellow wires are from an isolated 3 Amp resistive/1 Amp inductive relay contact.

Beskrivning

Antenna for weather and wind

A robust and weatherproof antenna that work with current and future cellular, ISM band at 868 MHz and wifi. The antenna is robust yet discreet, and has a sleek design that makes snow and ice sticks to it so easily.

Flexible mounting

The antenna provides flexible mounting on various materials and surfaces, it can be screwed onto a wall, attached to a cabinet or in a false ceiling. Installation is simple and only requires one to three holes drilled, one for an antenna cable and, depending on the surface, two holes for screw with a nut on the back, or tapping screws or screws and dowels.

We recommend these antennas in front of the so-called puck antennas because they offer a higher degree of amplification, in addition the installation is simple and requires no special tools.

Prooved performance

The antenna have been delivered worldwide for many years and is a proven reliable product. Normally it comes with 1 meter cable and SMA connector but we can make other execution upon request.

H685 MOBIL ROUTER

Product information

H685 Mobile Router is designed to set up a 2G / 3G / 4G mobile and Wi-Fi network and share a mobile broadband connection. H685 Router enables users to quickly create a secure Wi-Fi (802.11 b / g / n) network and provide access to the Internet via a cellular network. By connecting to the mobile network; an Internet connection is established and shared virtually anywhere within a wireless broadband network.

DTU (Optional)

With the DTU-function (Serial to Mobile Gateway function RS232 or RS485 port option).

Details:

Serial transmission: 300bps, 600bps, 1200bps, 2400bps, 4800bps, 9600bps, 19200bps, 38400bps, 57600bps, 115200 bps;

Serial parity: none, even, odd;

Serial Data Bits: 7, 8;

Serial Stop Bits: 1, 2;

Serial flow control: none, hardware, software;

Location: Server (up to 4 server center, OEMs can be more), client;

Protocol: TCP, UDP;

Heart Beat: Yes;

VPN

PPTP, L2TP, IPSec, GRE, Tunnel (PPTP Server, PPTP client, L2TP client, IPSec client, IPSec server)

OpenWRT: Optional

VRRP: Optional

Router

Static router;

Optional for dynamic Router (BGP, BGPD, OSPF, Zebra, Rip);

SNMP: Supports V1, V2, V3

VLAN: Supports multi-LAN IP address, supports two IP addresses

WI-FI (WLAN)

Optional, 802. 11b/g/n; 150Mbps default. 300Mbps optional.

Can be used as AP and client.

Frequencies from 2.4 GHz to 2.483 GHz, APs, Routers and Gateway Server use, wireless up to 254 PC users..

Fail Over Redundancy

Automatic call-up, maintain the link open.

Network-backup

LCP, ICMP control;

Build-in watch dog;

Mobile (2G/3G/4G), RJ45 WAN (xDSL, DHCP, Fast IP), WiFi client three-line redundancy;

Two H685 dual sim same network (Network 1 + Network 1);

Two H685 dual sim Two network (Network 2+ Network 2);

Two H685 dual sim dual mode network (WCDMA+CDMA2000, WCDMA+LTE, CDMA2000+LTE);

Cold Backup is default. Hot Backup optional; Cold Backup=WAN RJ45 and mobile WAN, not online at the same time. One online and the other standby, switch free..;

Hot Backup= WAN RJ45 and mobile WAN is online. Data enters the main line and switch to the other line. Alternating time for hot backup is shorter than Cold Backup.

POE

POE for LAN/WAN RJ45 (used with POE adapter)

Update of build-in software

Supports update of build-in software locally or remote (LAN, WiFi and OTA WAN)

Syslog: Local and remote

DDNS: Yes

DHCP Server: Yes

Others:

DNS Proxy;

Optimized EMC design;

Real-time clock (NTP, supports update with defined hours);

WAN/LAN/Memory statistics

Local/Remote profiles backup and receiving

Administration system Optional

Protocol

Protocol support

TCP, UDP, SMTP, POP, ICMP, FTP, PPP, PPPoE, DHCP, DDNS, DNS, WPS, DMZ, NAT, Xdsl, ntp, qOs, ect

Safety

Firewall

Supports 64/128 bits WEP, 802.1x, WPA, and WPA2
Supports WDS
Supports WPA1/2 – PSK
Supports WPA1/2 – 802.1x
Supports EAP – TLS, TTLS, LEAP, PEAP
TKIP, AES encryption
Supports access with username & password
Supports access to the control unit WAN/LAN interface
Supports access to the control units source, IP-adress.
Defense DOS attack, supports SYN flooding, IP surfing, ping of Death, fragile, teardrop, land etc.
Support PAP & CHAP
Supports IP filtering
Supports content filtering.
Supports NAT/NAPT/Port forwarding/DMZ

Advanced firewall features

Stateful Packet Inspection (SPI)
VPN Pass-through

Certificate: RADIUS client

Interface

LAN/WAN

1X 10/100M LAN port (RJ45 interface)
1X 10/100M WAN port (RJ45 interface)
(WAN RJ45 can be converted to LAN RJ45 to get 2 LAN RJ45)
WAN ports supports mobile/static IP/DHCP/PPPoE
(on request, keep alive, schedule, manual)

Antenna

2 antennas for Wi-Fi (removable, SMA interface * 1, Internal *1)
3 antennas for mobile and GPS (removable, 50Ω SMA female interface), Cellular support diversity receiving (MIMO) option

Led

SYS*1, VPN*1, Cell Signal*1, Cell*1, WAN*1, LAN*1, WiFi*1

Button: Reset

Console: 1 console port

Serial port: RS232 or RS485 build-in terminal block interface

Is a solid, gear box heaters with high performance, made to counter condensation in large equipment, control cabinets and switchboards.

An aluminum housing and a large number of profiles provides optimal heat transfer.

The unit is controlled via an internal thermostat

- Starts at ca 28 ° C (the unit's own temperature)
- Closes at approx. 68 ° C (the unit's own temperature) (can be altered at factory)

Cord crip from Metall

Technical data

Performance (P1) 110 – 250 Watt

Connection...Silicone cable 3 x 0.75mm² (UL/CSA: 3x1mm²) or plug connection

Voltage..... 220-240 VAC

..... 110 – 265 V AC/DC

..... 12 – 60 V AC/DC

Dimension 203 x 80 x 55mm

Mounting snap fittings for top rail 35mm

The small thermostats are particularly suitable for the use in switchgear cabinets and/or into other closed housings.

Type "THK", used for the control of cooling, exhaust or as signal generators.

Type "THH", finds employment as control for heaters or for switching signal devices.

Technical data

Voltage.....	24...240 V AC
Setting range	0-60°C

.....	max. 5A
Mounting	Snap contact
Dimensions.....	60 x 32 x 43mm
Weight.....	44g

The Hygrostat "HY/WE" is an electromechanical regulator for relative humidity. The hygrostat does not require any power supply. The switch contact can be directly used for control of electric loads.

The switch point setting (10% to 80 % rH) is done by a rotary switch.

At the end position, the switch is always closed or open, independent of the air humidity value.

Technical data

Voltage.....	24...240V AC
Setting range	10 – 80% Rel. Atmospheric humidity
Mounting	Snap contact for DIN-Rail 35mm
Switching current.....	Humidity: 2,2 A
	Dehumidity: 5A
Enclosure	IP30 Plastic UL94 V-O
Contact.....	change-over switch
Dimension	60 x 95 x 45mm
Radio interference.....	N (VDE 0875)

- Quickly connected
- Available with or without fuse
- Clip fixing

The DIN-rail mounted electrical socket can be quickly fitted and connected in enclosures allowing the use of auxiliary products such as hand l amps, measuring devices, soldering irons etc. The unit is available with and without fuse and in all major world socket standards.

Technical data

Connection:.....3x pressure lamps for

1) Fuse Ø 5 x 20mm

- Can be used in every part of the world thanks to its wide input-voltage range and to it having been tested and assessed by international agencies (EN/CE/UL)
- Stable and short-circuit proof output with adjustable output voltage
- Over-voltage protection, primary and secondary
- DIN-rail mounting is as easy as could be
- Compact dimensions and low weight
- Wide temperature range, with over-temperature protection
- Very good price/performance relation
- A good choice for power distribution applications in building automation and for switch-cabinet installations in automation engineering

Safety

..... IEC 60950, EN 60950, VDE 0805 Safety class1
 UL508-listed/ UL 60950/CSA 22-2-60950,
 SELV according to EN 60950

Ensure fire protection by means of the surrounding housing system.

Operating data

Temperature range -25°C to 70°C,
 integral fan, air intake bottom up.
 Derate 2.5%/K at +80°C (see drawing)
 Weight 0.6kg

Mekanichal

Connection Mains power intake: 3-pole terminal,
 connectable RM 7.62

Charging socket: 4-pole terminal, connectable RM 5.08

Mounting: All systems can be fixed on a symmetrical DIN-rail according to 50022 with a diameter of 1 to 2.5 mm or be screwed directly on to the wall. Kindly note installation conditions.

Technical data

Standards.....	AS/NZS 61009-1
Magnetic tripping characteristics.....	B, C
Residual tripping characteristics.....	A, AC
Rated current (A)	6, 10, 16, 25, 32, 40
Rated residual current.....	10mA, 30mA, 100mA
Calibration temperature	30°C
Rated voltage 1 P.....	240V
Frequency.....	50/60
Max. Service voltage.....	264
Tripping duration.....	Instantaneous 0.1s
Power supply	Top or bottom
Selectivity class	3
Residual making and breaking capacity.....	2000A
Short circuit capacity	6000A
Isolation application (IEC 60947-2).....	Ja
Insulation resistance (Mohm)	1,000
Insulation voltage (V).....	500
Dielectric rigidity (V)	2,500
Vibration resistance.....	1.5g
Endurance (operations) electrical	>6,000
Mechanical	>20,000
Protection degree outside	IP20
Inside enclosure	IP40
Self-extinguishing degree (UL 94)	V2
Tropicalisation (IEC 60068-2)	+55°C/95% RH
Operating temperature	-5/+55°C
Storage temperature	-25/+70°C
Terminal capacity (top & bottom) min / max.....	1-16mm
Terminal torque (top/bottom)	3
Busbar systems.....	Yes
Accessories.....	No
Dimensions (mm)	H72 x L81 x B18
Weight (g).....	105

TEMPERATURE SENSOR THERMOELEMENT TYPE K AND EXTENSION CABLE

Range of application

Extension cable.

Fabricate: Velox

Delivery: ready-made lengths of 5-10-25-50-100m.

Technical data:

Conductor: +Pol NiCr 1.00mm² (32x0,20mmØ)

..... -Pol Ni 1,00mm² (32x0.20 mmØ)

Outer insulation:PVC, Wdd.-0,40mm

Colour code: + green, - white

Sheath: PUR, Wdd. – 0.80mm

Colour: Green

Outer Ø:5.4mm

Rated voltagemax. 600V

Testvoltage 2000 V

Temperature range: 5°C - +70°C

Tolerance:.....acc. IEC 584, Sheet 3, Kl 1 ±60µV(±1,5 K)

Order information

Part.no: 3950110X

Description: Thermoelement Type K

Uppbyggnad

Temperaturgivare Ø 8mm
